

TRI - GOLF

LOWER KEY STAGE 2

KEY SKILLS

Putting
Chipping
Aiming
Linking skills

Knowledge of putting and chipping
Decision making
Describing

Resilience
Working together

- ✓ To develop my putting technique
- ✓ To develop and apply the putting technique
- ✓ To introduce the chipping technique
- ✓ To develop and apply the chipping technique
- ✓ To apply skills in a tri golf tournament
- ✓ To use skills around a mini golf course

ASSESSMENT CRITERIA:

BRONZE

Children hold the putter correctly

Children to putt using the correct technique and are sometimes successful

Children begin to use the correct technique to sometimes chip the ball into the air

Children aim their club in the direction of their target and are sometimes successful from a close range

Children can apply chipping and putting skills and are sometime successful.

SILVER

Children use the tick tock swing to sometimes putt the ball

Children putt the ball and are often successful

Children chip the ball and it often goes into the air

Children aim at a target and using the tick tock swing are often successful in hitting the target

Children can apply chipping and putting skills and are often successful.

GOLD

Children use the correct technique to putt the ball accurately and with control

Children are consistently successful in their putting and encourage others, helping improve their technique where possible

Children chip the ball successfully into a target

Children adjust the power they use in their putt depending on the distance

Children use their knowledge of golf skills to support others, correcting technique and producing maximum points

LEARNING OBJECTIVE:

Can you develop your putting technique?

RESOURCES:

Putters, small balls, cones.

ASSESSMENT CRITERIA:

- BRONZE** Hold the putter correctly and know how to stand
- SILVER** Use the tick tock swing to sometimes putt the ball.
- GOLD** Use the correct technique to putt the ball accurately and with control

WARM UP

Simon Says – Pupils perform different activities, try and trick them by omitting the Simon says. Ensure activities are active, such as jogging on the spot or star jumps. Choose children to be the lead.

MAIN ACTIVITY

Model to the children what a putter is and what it is for:
The putter is the red headed club in a tri golf set. It is flat on one side (two depending on the club).
Putting is required for accuracy and shorter distances.

Determine the dominant hand of each child. Usually the hand they write with.

When holding a putter the non dominant hand goes at the top of the club and the dominant hand directly below it. The body should be sideways on to the target. Feet should be a comfortable distance apart.

TASK 1 - the tick tock swing

When Children have developed the technique to hold a putter correctly they should now move onto the swing. Ensure they know the safety features and that putting is not for big swings. The club should swing from foot to foot – the tick tock swing. Children do not need to watch the club when it swings but should always have their eye on the ball.

In partners one child places a cone down on the grass. The other child puts the ball trying to hit the cone. Take it in turns.

Lesson continued on next page

LEARNING OBJECTIVE:

Can you develop your putting technique?

RESOURCES:

Putters, small balls, cones.

TEACHING POINTS:

When holding a putter the non dominant hand goes at the top of the club and the dominant hand directly below it. The body should be sideways on to the target. Feet should be a comfortable distance apart.

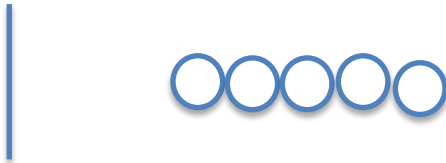

LESSON KEYWORDS:

Putt
Aim
concentration

MAIN ACTIVITY

TASK 2 - Dominoes

Each pair to stand behind a line. In front of them should be 5 cones in a line.

On the command of the teacher each team should try and putt the ball to hit the front cone. If they do they may run and collect the cone. The first team to have hit all of their cones is the winner. 🏃 🧠 ❤️

Repeat the activity but make it harder for the winners by moving their cones back further. If limited on cones or equipment then have more children in a team.

📶 **Made easier:** Have fewer cones, closer to the line.

📶 **Made harder:** Move cones further away or have more cones.

COOL DOWN

Choose children to model the correct technique for putting. 🧠

Closes to the cone.

Place 1 cone on the grass. All children to put towards the cone. Who is the most accurate? 🏃

LEARNING OBJECTIVE:

Can you develop and apply the putting technique?

RESOURCES:

Balls, cones, hoops, putters

ASSESSMENT CRITERIA:

- BRONZE** Putt using the correct technique and are sometimes successful
- SILVER** Putt the ball accurately and are often successful.
- GOLD** Consistently successful in their putting, help others improve their technique where possible.

WARM UP

Moving around the area. Teacher calls right for right hand to touch the floor, left for left hand, both for both hands and change to change direction. Children may be jogging, running, skipping, jumping...

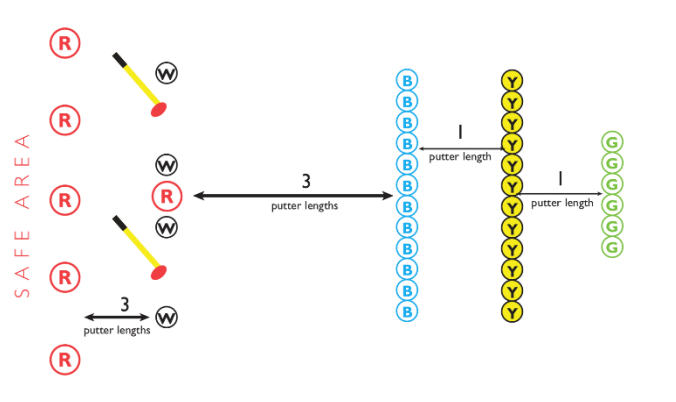

MAIN ACTIVITY

Revisit the tick tock swing and ensure children have the correct technique.  

TASK 1 - Finders Keepers

Children to have 3 balls and to putt towards the blue cones first. Each time a cone is hit they may remove it. All blue cones must be hit before yellow cones can be removed. Repeat for yellow and move onto green. The first team to remove all the cones is the winner.

Lesson continued on next page

LEARNING OBJECTIVE:

Can you develop and apply the putting technique?

RESOURCES:

Balls, cones, hoops, putters

TEACHING POINTS:

SAFETY: when putting children should move to the white cone. Only the putter may collect the balls. All other children must remain behind the red cones until the putter has returned with all the balls.

LESSON KEYWORDS:

Tick tick
Safety
aim

MAIN ACTIVITY

TASK 2 - Tunnel Ball

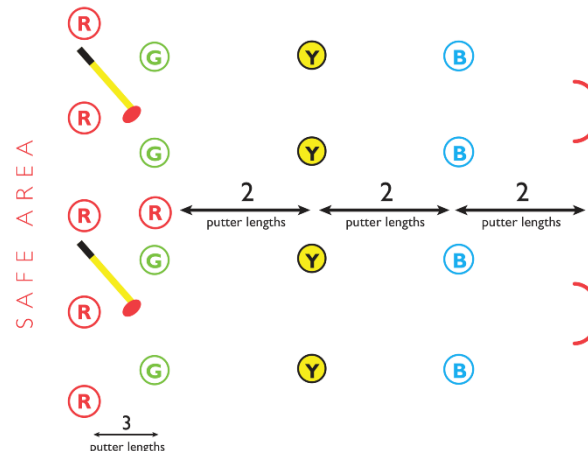

Children can choose to putt into the hoop from the green, yellow, or blue cones. The closer the putt the less points scored. Children have 3 attempts. The ball must remain in the hoop to score. 🏃🧠

Blue = 1 point

Yellow = 5 points

Green = 10 points

Extension – have teams place against each other
The first team to 30 points is the winner.

COOL DOWN

Gateways

Set out a range of gates for children to putt the ball through to another team mate. 🏃

Working together they have 2 minutes to see how many gates they can putt through

Made easier: Larger hoop target

Made harder: Move distances further away from the target

LEARNING OBJECTIVE:

Can you explore the chipping technique?

RESOURCES:

Chippers, balls, cones, hoops

ASSESSMENT CRITERIA:

- BRONZE** Begin to use the correct technique to sometimes chip the ball into the air.
- SILVER** Chip the ball and it often goes into the air.
- GOLD** Chip the ball successfully into a target

WARM UP

Dishes and Domes to work on hand to eye coordination

Spread cones in an area, some facing the correct way and some upside down

The dishes team want to turn all the cones upside down and the domes team want to turn the cones the correct way up

MAIN ACTIVITY

Set up a large square/ rectangle of white cones, approximately the size of a netball court. Put the children into pairs and space them out around the rectangle. Space is important for safety, Golf clubs will be swinging and children should be mindful of those around them. The rest of the children should be behind the red cone, a minimum of 2 meters away. Children will be chipping into the middle of the rectangle/ square.

TASK 1 - The Chip

The difference between putting and chipping is that for chipping we are trying to get the ball into the air. For that we need the club to get underneath the ball and scoop it upwards. We aren't looking for the ball to go miles so can still use the tick tock swing with a slight lift and the end of the shot (not up by the shoulders, just between the knee and hip). 

Give children time to have a go at chipping and getting the ball into the air. All children should retrieve their ball at the same time to ensure they aren't likely to be hit with a ball. 

Lesson continued on next page

LEARNING OBJECTIVE:

Can you explore the chipping technique?

RESOURCES:

Chippers, balls, cones, hoops

TEACHING POINTS:

Ensure children are aware of the safety precautions and are following the rules.
Ensure right handed and left handed children are using the correct putter.

LESSON KEYWORDS:

Chip, aim, lift, safe, target

MAIN ACTIVITY

TASK 2 - Target practice

Within the rectangle layout a large number of hoops all over. Tell the children they are now aiming to chip the ball into a hoop. For every hoop the balls lands in they get 5 points. This still counts if the ball lands in the hoop and bounces out. Children should have 3 attempts each and then swap with their partner. If the ball does not lift off of the ground the points do not count.

COOL DOWN

Lay 1 hoop in the middle of the targeted area. See who can chip their ball closes to the hoop.

Discuss with a partner or person next to them about the difference between putting and chipping.

 **Made easier:** Use the tees to help children lift the ball off of the

 **Made harder:** ground. Less hoops to aim for.

LEARNING OBJECTIVE:

Can you develop and apply the chipping technique?

RESOURCES:

Chippers, tees, cones, target, chalk

ASSESSMENT CRITERIA:

- BRONZE** Am my club in the direction of the target and are sometimes successful from a close range.
- SILVER** Aim at a target and using the tick tock swing are often successful at hitting the target or land in close range of the target. C
- GOLD** Adjust the power I use in my putt depending on the distance of the target and are often successful in getting the ball on target.

WARM UP

Hit and move: 

Set up 3 channels – children to work in groups of 3, they have to take it to turns to hit their ball up the channel, once 1 child has hit the ball they go back and next child goes to the ball and hits it on, if the ball goes out the channel they have to start again.

MAIN ACTIVITY

Revisit the chipping technique and discuss what the technique is for, when it would be appropriate to use. 

TASK 1 - Grand National

Children should chip the ball to land in a given area.

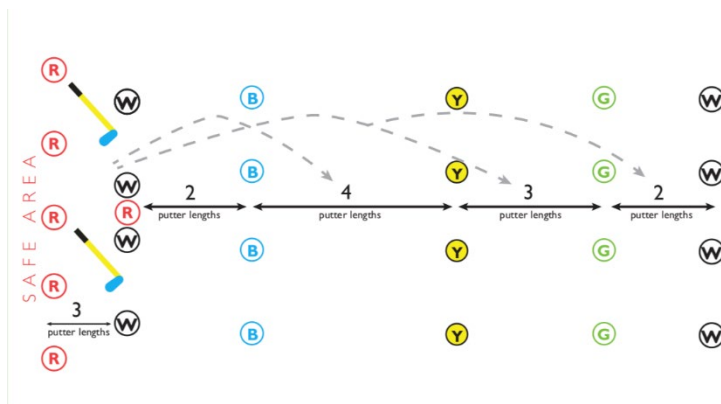

If the ball lands between the blue and yellow = 1 point

Yellow and green = 5 points

Green and white = 10 points

If the ball goes beyond the white or doesn't reach the blue = 0 points

If the ball does not go in the air = 0 points.

Lesson continued on next page

LEARNING OBJECTIVE:

Can I develop and apply the chipping technique?

RESOURCES:

Chippers, tees, cones, target, chalk,

TEACHING POINTS:

Children should always have their bodies sideways on.
Line up the club before chipping to ensure the club will make contact with the bottom of the ball.

LESSON KEYWORDS:

Chipping
Aiming
Accuracy

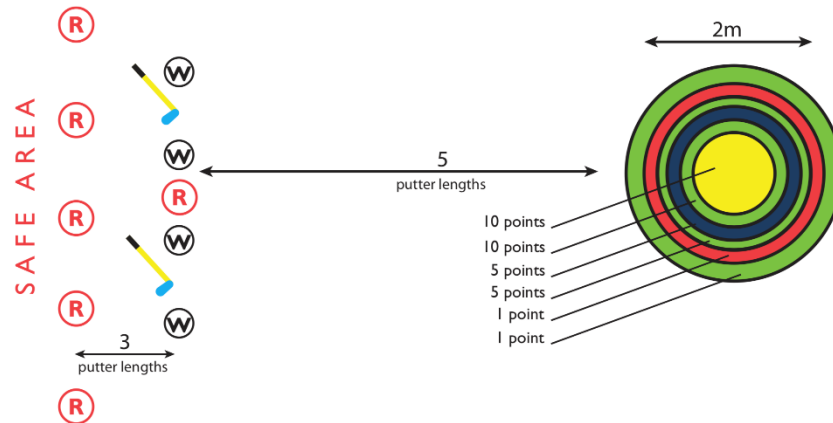

MAIN ACTIVITY

TASK 2 – Bullseye

This activity can be done by using a target on the floor or on a wall. It can be drawn, made with cones or using an actual target.

Children must chip the ball and aim for the bullseye.
The closer to the bullseye the more points will be achieved.

Children should have 3 attempts and then swap with another child.

COOL DOWN

3 chip challenge

Set out 3 cones at different distances, children have to choose which cone they are aiming for and will get 1 point if they manage to get near the cone

- Made easier:** Children to start closer to the target to improve individual success
- Made harder:** Children to start further away from the target or stand at a different angle to improve aim

LEARNING OBJECTIVE:

Can I apply skills in a tri golf tournament?

RESOURCES:

Putters, Chippers, golf balls, cones

ASSESSMENT CRITERIA:

- BRONZE** Apply chipping and putting skills and are sometime successful.
- SILVER** Apply chipping and putting skills and are often successful.
- GOLD** Use my knowledge of golf skills to support others, correcting technique and produce maximum points.

WARM UP

Children to move around an allocated area. This could be jogging, skipping, travelling backwards etc. When you call chipping or putting the children must stop and using an imaginary club perform the correct technique.

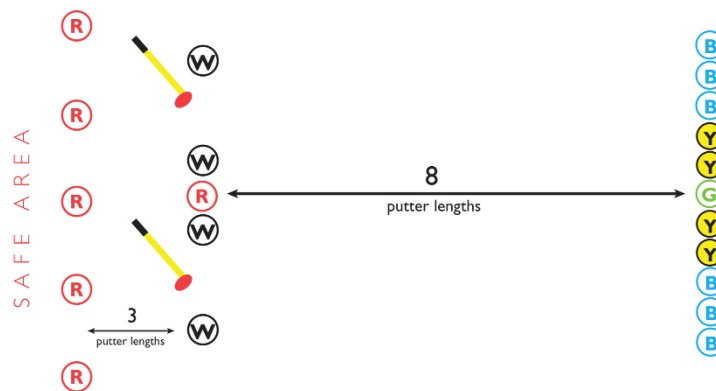

MAIN ACTIVITY

Introduce the final activities:

Zone Ball. Putt towards the line of cones. Do not remove cones if they are hit but record the allocated scores. Blue – 1 point, yellow – 5 points, green – 10 points

Lesson continued on next page

LEARNING OBJECTIVE:

Can I apply skills in a tri golf tournament?

RESOURCES:

Chippers, Putters, Golf balls, cones, hoops, targets, bibs

TEACHING POINTS:

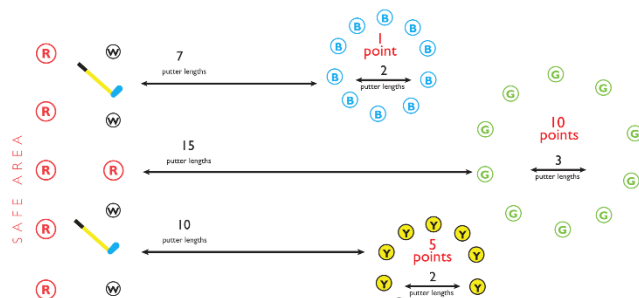

Use the tick tick swing as a gentle smooth motion
when chipping aim for the bottom of the ball and lift the club at the end of the swing
When creating a mini golf course children can set a par amount (how many hits of the ball to aim to get into the target/hole).

LESSON KEYWORDS:

Putting, Chipping, Aiming, teamwork, creativity

MAIN ACTIVITY

Going For green. Chip the ball to land in the circle. Each circle is worth a different amount of points. The ball must go in the air. Rolling balls do not score any points.

Putt for dough, Chip for show. Chip the ball to go in the air and land between the start and finish cone. If it lands successfully, retrieve the ball and putt it to land in the hoop. Both are worth 10 points each. The putting can only be done after a successful chip.

COOL DOWN

Play the course

Set up a mini golf course with obstacles (use bibs to make water and lava) children to work in groups to complete the course

What do you feel you improved most on in this term - discuss with a partner and why you feel that way.

Made easier: Children to start closer to the targets. Children to have a practice round to improve chipping skills.

Made harder: Children to aim for furthest target or start slightly further back from targets.

Team Name
