

ATHLETICS

YEAR 2

PRIOR LEARNING:

- Copy different ways for running for speed and distance.
- Run in different directions and at different speeds.
- Copy basic jumping patterns and land with control.
- Copy throwing techniques with some accuracy i.e. underarm, overarm, chest push.
- Begin to use body to generate power when throwing for distance.

LEARNING INTENTIONS:

- ✓ Can you run at speed?
- ✓ Can you develop a good running pace to run for a longer period of time?
- ✓ Can you remember and perform different jumping patterns?
- ✓ Can you know how to use your body to jump for height or distance?
- ✓ Can you run and jump over different obstacles?
- ✓ Can you perform a push or throw?
- ✓ Do you know the difference in throws and how to perform a pull throw?
- ✓ Can you work cooperatively as a team to perform relays?

KEY SKILLS

Running for speed
Running for sustained periods
Jumping patterns
Jumping for height
Jumping for distance
Running over obstacles
Push throw
Pull throw
Passing batons

Remembering
Describing
Making comments
Pacing
Decision making

Cooperate with others
Resilience
Determination

ASSESSMENT CRITERIA:

BRONZE	SILVER	GOLD
I can sometimes react quickly, and I know what to do with my arms to run fast	I can often react quickly. I can pump my arms forwards/backwards, look forward and move my legs quickly	I can react quickly and run with a smooth action. I remember what to do with my body to run as fast as I can.
Develop my resilience to keep running in different directions at various speed for the length of the task.	I understand what pacing is and can sometimes pace myself accurately by running at a medium speed.	I understand why pacing is important and I choose accurate speed to keep running for the length of the task.
I can remember some jumping patterns and perform them safely.	I can remember different jumping patterns and perform them accurately with controlled landings	I can perform different jumping patterns at speed and know what to do with my body to jump as far as I can
Copy a standing long jump and land safely	I know how to use my body effectively to jump for distance or height and I can accurately measure my partner.	I can describe what my body is doing and I can demonstrate powerful jumps
I can copy and repeat different jumps over obstacles with some accuracy.	I can cooperate with my team to move over obstacles in various ways.	I show control and make limited mistakes when moving over obstacles at speed.
I can describe a push and pull throw and copy with some accuracy.	Repeatedly push and pull throw with accuracy from kneeling and standing	Use my body effectively to push and pull as far keeping good technique and describe what my body is doing.
I can cooperate with others to perform tasks often accurately.	know what my team needs to do to perform with accuracy and speed.	I can keep control of my body and support my team mates to know where and when they need to run.

[illegible]

LEARNING OBJECTIVE:

Can you run at speed?

RESOURCES:

Bibs, cones, hoops

ASSESSMENT CRITERIA:

BRONZE

I can sometimes react quickly, and I know what to do with my arms to run fast

SILVER

I can often react quickly. I can pump my arms forwards/backwards, look forward and move my legs quickly

GOLD

I can react quickly and run with a smooth action. I remember what to do with my body to run as fast as I can.

WARM UP

Set up a playing area with boundaries using lines or cones. Each child to tuck 1 x bib into hip. 2 x children to not wear bib they are the taggers. If a bib is stolen by a tagger they must place their bib inside a hoop and join the taggers until all children have been caught. Focus on quick changes of direction. Repeat using smaller playing area.

MAIN ACTIVITY

TASK 1 - Speed tasks – encourage children to look forward at their finish line rather than down at the floor during tasks.

- Jogging on spot, when teacher claps hands fast feet.
- Split step on spot – jumping feet in and out, when teacher claps fast feet.
- Spotty dogs on spot – feet forwards and backwards on teacher's clap fast feet.

Why do you think it is important to look forwards when moving fast?

TASK 2 - Rats & Rabbits - In pairs standing side by side in 2 straight lines facing the teacher. Set of cones of line to the side of each line. 1 line are called the rats and 1 line the rabbits. If rats is called by teacher the rat line must react quickly and run to the set of cones or line closest to them before being tagged by their partner the rabbit. If rabbit is called the opposite occurs. Focus on quick reactions, why is reaction time important when moving fast?

TASK 3 - Shuttle runs for speed working in pairs or 4's.

Lesson continued on next page

What do I need to do to run fast? What should I be doing with my arms? What should I be doing with my legs/feet? Bring knees up, run on balls of feet.

LEARNING OBJECTIVE:

Can you run at speed?

RESOURCES:

Bibs, cones, hoops

TEACHING POINTS:

Thumbs move from 'hips to lips' keep elbows close to body.
Looking forwards when running

LESSON KEYWORDS:

Relay
Shuttle
Runs

MAIN ACTIVITY

TASK 4 - Bean bag relay in 4's. 3 x hoops and 8 + bean bags/other equipment per race. Children to run 1 at a time towards a centre hoop which holds all bean bags (other equipment can be used too) collect and return to the hoop placed at the front of their line. Teams continue to collect as many bean bags as they can until all bean bags have been taken from centre hoop. The winning team is the 1 with the most amount of equipment. Rotate teams.

COOL DOWN

Gears – set out area that children must travel inside. Children to travel at the speed called out 1st, 2nd, 3rd, 4th gear, avoiding each other.

Can you describe what I need to do with my arms to run as fast as I can? Repeat with head, legs, feet as appropriate according to ability.

 **Made easier:** cones closer together, hoops closer together.

 **Made harder:** cones further apart, more teaching points to consider, hoops further away.

LEARNING OBJECTIVE:

Can you develop a good running pace to run for a longer period of time?

RESOURCES:

Cones

ASSESSMENT CRITERIA:

BRONZE

I develop my resilience to keep running in different directions at various speed for the length of the task.

SILVER

I understand what pacing is and can sometimes pace myself accurately by running at a medium speed.

GOLD

I understand why pacing is important and I choose accurate speed to keep running for the length of the task.

WARM UP

Discuss the difference between running at speed and running for long periods of time.

Walking and then Jogging continuously for 1 minute - 2 minutes

MAIN ACTIVITY

TASK 1 - Follow my leader in pairs aiming to stay close together. Child at the front sets the speed that the pair will run at. Repeat and swap roles on teachers command 'change'.

TASK 2 - Pairs join to make a group of 4 standing 1 behind the other. Repeat task above with front child leading and group of 4 attempting to stay close together. Repeat with different leader. If team are struggling to keep up leader must slow pace down.

Set time limit of 1-3 minutes can they keep travelling without stopping for 1-3 minutes depending on ability.

Assess performance did they start off too fast? What speed did they attempt to travel at?

LEARNING OBJECTIVE:

Can you develop a good running pace to run for a longer period of time?

RESOURCES:

Cones

TEACHING POINTS:

Encourage children to try different paces to keep close together.

LESSON KEYWORDS:

Pace

Cardio

MAIN ACTIVITY

TASK 3 - Circuits using cardio activities as whole class such as; star jumps, skipping, spotty dogs, ski jumps etc. Can they perform for 30 secs – 45 secs without stopping?

Repeat in pairs – partner to count number of exercises they achieved in time and feedback to partner after each task.

Progression – repeat attempting to improve on personal best.

Walking around area on teachers whistle change direction. Light stretches.

Do you think you have improved your ability to keep moving without stopping? Which exercises were the easiest/hardest to keep doing without stopping?

 **Made easier:** shorter periods of time to work without stopping. Travel at walking speed without stopping.

 **Made harder:** longer periods of time. Travel at jogging speeds without stopping.

LEARNING OBJECTIVE:

Can you remember and perform different jumping patterns?

RESOURCES:

cones, jumping circuit cards.

ASSESSMENT CRITERIA:

BRONZE

I can remember some jumping patterns and perform them safely.

SILVER

I can remember different jumping patterns and perform them accurately with controlled landings

GOLD

I can perform different patterns at speed and I know what to do with my body to jump for distance.

WARM UP

Foxes and rabbits.
Foxes can run,
rabbits can only
hop, stride or jump.
If a rabbit is caught
they must jump on
the spot until
another rabbit free's
them by touching
them gently.

Teacher led
stretching of legs,
arms and ankles

MAIN ACTIVITY

Discuss in which ways the rabbits jumped.

TASK 1 - In pairs how many different jumps can you come up with? 2-2, 1-1 (same) 1-1 (other) 1-2, 2-1

TASK 2 - Jumping pattern combinations can be performed as a circuit in small groups.

3 x 2-2 feet jumps in a row	3 x hops in a row (1-1-1)	Hop, hop, jump (2-2)
Hopscotch hop, jump, hop, jump	Hop, step, jump.	Jump, jump, hop

Lesson continued on next page

LEARNING OBJECTIVE:

Can you remember and perform different jumping patterns?

RESOURCES:

cones, jumping circuit cards.

TEACHING POINTS:

Bend knees when landing to prevent injury.
Bend knees to take off to get more distance to jump/hop

LESSON KEYWORDS:

Combinations
Take-off

MAIN ACTIVITY

TASK 3: Partner challenge. Choose 1 x jumping pattern from the circuit. Create a start line using cones or a throw down line. Take it turns to perform chosen jumping combination from behind start line.

Add marking distance achieved with individual cone and attempt to beat PB each time. Repeat with other jumping combinations

TASK 4: Attempt own jumping combinations of 3 or more actions. Challenge other pairs to do your jump patterns.

Gentle jogging on teachers command perform hop, jump, 2-1, 1-2, hop- step, hop step, jump, hop, jump, hop etc

Show others jumping combinations. Can others copy and repeat?

 **Made easier:** take out 1 x jump from a combination.

 **Made harder:** repeat jumping patterns more times in a row.

LEARNING OBJECTIVE:

Can you know and show how to use your body to jump for height or distance?

RESOURCES:

Cones

ASSESSMENT CRITERIA:

BRONZE

I can perform a standing long jump with a safe landing.

SILVER

I know how to use my body effectively to jump for distance or height and I can accurately measure my partner.

GOLD

I can describe what my body is doing and I can demonstrate powerful jumps

WARM UP

Set up an activity area which the children must remain within. Gears 1, 2, 3 children to travel at speeds dictated by teacher. On command jump children to jump and land safely. Try with different simple jumping combinations. Active stretches: Sumo walks; walking in squat position by turning through 180 degrees. Walking lunges; 1 foot in front of the other stay low and walk switching front leg each time.

Lesson continued on next page

MAIN ACTIVITY

TASK 1: Jumping challenges:

Jumping with arms by side

Jumping with hands on hips

Jumping with hands on head

Jumping with arms swinging slowly

Jumping with fast, swinging arms

TASK 2 - Standing vertical jump – Children to see how high they can jump from 2-2 feet. Children to stand sideways onto a wall. Reach up with the arm that is closest to the wall as a starting guide, then use body to generate power to jump higher than starting point. In pairs 1 can record starting point and how many bricks they are able to jump. Or place pictures at different heights on the wall for them to jump and touch.

LEARNING OBJECTIVE:

Can you know and show how to use your body to jump for height or distance?

RESOURCES:

Cones

TEACHING POINTS:

Bend knees when landing to prevent injury.
 Bend knees to take off to get more distance to jump.
 Show children that you always place your marker at the back of the persons foot.

LESSON KEYWORDS:

Distance
 Long jump
 Personal best

MAIN ACTIVITY

TASK 3 - Distance jumping 2-2 feet. What do you need to do with your body to jump as far as you can?

TASK 4 - Partner challenge - 1 cone or line marks take off board. How far can you jump from the take-off line from 2-2 feet.

1 x cone each. Partner to mark the distance you have jumped from the take-off board. Leave the cone on the ground and see if you can beat your personal best.

COOL DOWN

Kangaroo over the fence – High vertical jump
 Kangaroo side to side – left to right jumping
 Kangaroo paws on your head – to small jumps forward hands on head
 Kangaroo fast as you can – as many small jumps as you can
 Kangaroo slow as you can – slow exaggerated jumps Describing to a partner what you need to do with your body in order to as high or as far as possible.

 **Made easier:** beating personal bests, if using pictures on wall place them lower.

 **Made harder:** beating personal bests, pictures placed higher. Use 1-2 foot jumping patterns or 2 jumps in a row.

LEARNING OBJECTIVE:

Can you run and jump over different obstacles?

RESOURCES:

cones, ladders, mini hurdles, throw down lines

ASSESSMENT CRITERIA:

- BRONZE** I can copy and repeat different jumps over obstacles with some accuracy.
- SILVER** I can cooperate with my team to move over obstacles in various ways.
- GOLD** I show control and make limited mistakes when moving over obstacles at speed.

WARM UP

Set a large number of cones up some face up and some face down. Separate the class into 2 teams; domes and dishes. The team that are domes need to turn the cones the normal way up. The team that are dishes need to turn the opposite way up. Children must stay on their feet and move from 1 cone to the next. The winning team is the 1 with the most number of cones their way upwards.

Lesson continued on next page

MAIN ACTIVITY

TASK 1 -Speed bounce over line, cone or wedge depending on ability. Discuss technique of keeping knees up, looking forward take off on 2 feet land on 2 feet sideways on to the line/cone/wedge.

Partner to count number of speed bounces achieved in 20 sec's. Repeat and change roles. Can you beat PB? Bronze = 8, Silver = 15, Gold = 25

TASK 2 - In small groups set up agility ladders for children to attempt different jumping patterns such as:

1. Ladder – 1 foot in each square
2. Ladder – 2 feet in each square
3. Ladder – sideways – 2 feet in each square
4. Ladder – step in step out (up and down then to the side)
5. Hop scotch

LEARNING OBJECTIVE:

Can you run and jump over different obstacles?

RESOURCES:

cones, ladders, mini hurdles, throw down lines

TEACHING POINTS:

Run on your toes when running through the ladder.

Bring knees high when doing the speed bounce so you don't touch the cone/wedge.

LESSON KEYWORDS:

Hurdles

Obstacles

Relay

MAIN ACTIVITY

TASK 3 - Mini hurdles

1. Mini hurdles – stepping over
2. Mini hurdles – running over
3. Mini hurdles – jumping over

TASK 4 - Relays

In teams incorporating ladders, hurdles and speed bounce passing a quoit or baton. Cooperate as a team to ensure children go at the correct time and encourage one another.

COOL DOWN

Gentle jogging on teachers call;

1 = left hand on floor
2 = right hand on floor

3 = change direction

Which jumping patterns were the most challenging and why?

What do you need to do with your body to be successful when; speed bouncing, jumping over hurdles/obstacles, travelling along ladders?

 **Made easier:** lower obstacles i.e. lines or cones.

 **Made harder:** higher obstacles i.e. wedges, hurdles, more challenging stepping/jumping patterns.

LEARNING OBJECTIVE:

Can you perform a push throw?

RESOURCES:

cones, medium/large balls, bean bags.

ASSESSMENT CRITERIA:

BRONZE

I can describe a push throw and copy with some accuracy.

SILVER

I can repeatedly push throw with accuracy from kneeling and standing.

GOLD

I can use my body effectively to push throw for distance. I can describe what my body is doing.

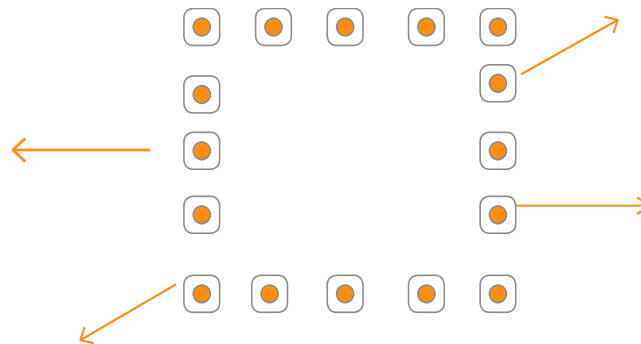

WARM UP

Working in small groups of approximately 4. Children to stand 1 behind the other with front person holding the ball. Children attempt to pass the ball over their head and under/through their legs alternatively to the child behind them. When the back child receives the ball the must run to the front to begin the cycle again. Teacher led stretching focusing on arms; shoulder rolls, wrist rotations etc.

MAIN ACTIVITY

TASK 1 - Bounce it, push it. In pairs 1 medium sized ball between 2. Stand facing partner teacher calls out push (chest push) or bounce (push ball into floor) Repeat in groups of 4 spaced further apart.

TASK 2 - Set up a throwing square using cones. Working in pairs numbered 1 and 2. Children take it in turns to throw outwards from their throwing cone. Their partner should wait in a safe place inside the throwing square.

Lesson continued on next page

LEARNING OBJECTIVE:

Can you perform a push throw?

RESOURCES:

cones, medium/large balls, bean bags.

TEACHING POINTS:

Mark distance where it first hits the floor with cone/marker
 Do not step over/past cone when throwing.
 Aim for 45 degree angle to get more distance.

LESSON KEYWORDS:

Shot Put
 Push

MAIN ACTIVITY

TASK 3 - In pairs - 2 handed push throw from chest for distance. How far can you push? Collect on teachers command if appropriate. Mark distance where it first hits the floor with cone. Can you beat personal best?

TASK 4 - Using smaller ball, bean bag or shot - 1 handed push from seated and or then knees facing direction of throw

TASK 5 - 1 handed push from knees sideways on

TASK 6 - 1 handed push from feet standing

Task 7 - What time is it? Set up 3 clock faces using hoops to indicate 12, 3, 6, 9 o'clock. Split the class into 3 groups. Teacher says a time and pupils in the centre of the clock face push 2 bean bags/shots using 1 handed push into the appropriate hoop.

COOL DOWN

Gears - children to travel at the speed called out 1st, 2nd, 3rd, 4th gear. Gradually getting slower.

How many coaching points can you name when performing a push throw? What do you need to do with your body to push as far as you can?

 **Made easier:** remain on knees, targets closer or larger.
 **Made harder:** standing throws, targets further away or smaller.

LEARNING OBJECTIVE:

Do you know the difference in throws and how to perform a pull throw?

RESOURCES:

cones, medium/large balls, bean bags.

ASSESSMENT CRITERIA:

BRONZE

I can describe a pull throw and copy with some accuracy.

SILVER

I can repeatedly pull throw with accuracy from kneeling and standing.

GOLD

I can use my body effectively to pull throw for distance. I can describe what my body is doing.

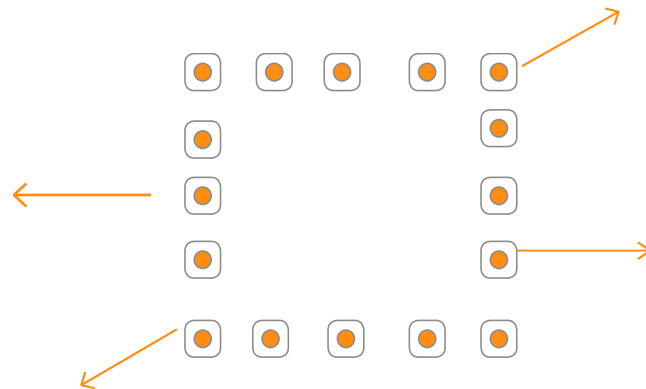

WARM UP

Beat the clock. Divide class into smaller groups of 5/6. Groups to stand in a circle with 1 bean bag. Aim is to pass bean bag to the next person to your right and then run around the edge of the circle back to place. Repeat with bigger circles.

Teacher led stretching focusing on arms; shoulder rolls, wrist rotations etc.

MAIN ACTIVITY

Set up a throwing square as above lesson using cones. Working in pairs numbered 1 and 2. Children take it in turns to throw outwards from their throwing cone. Their partner should wait in a safe place inside the throwing square.

TASK 1 - 2 handed pull throw from knees using medium sized ball or bean bag. T.P: Hold bean bag/ball overhead in 2 hand. Begin with elbows bent. In preparation to throw straighten arms and attempt to release above head approx. 45 degrees.

TASK 2 - 2 handed pull throw from feet facing throw. Throwing for distance.

Lesson continued on next page

LEARNING OBJECTIVE:

Do you know the difference in throws and how to perform a pull throw?

RESOURCES:

cones, medium/large balls, bean bags.

TEACHING POINTS:

Mark distance where it first hits the floor with cone/marker Do not step over/past cone when throwing.
Aim for 45 degree angle to get more distance.

LESSON KEYWORDS:

Javelin
Pull

MAIN ACTIVITY

TASK 3: Angles- Standing with bean bag in 1 hand and opposite leg forward. Attempt a 1 handed pull throw with arm in 3 different positions;

Position 1: arm straight up in air

Position 2: straight arm just behind head

Position 3: straight arm back behind you.

1 handed pull from sideways on.

TASK 4: Pull challenges. Using the 4 sides of the throwing square set up different throwing challenges; Place hoops/line of cones etc as targets and several different throwing implements at each station; medium sized ball, bean bag, foam javelin, small ball.

Children to use a combination of 1 and 2 handed pull throws. Hoops/cones can be added to differentiate or throwing line moved further away/closer.

COOL DOWN

Relaxation focusing on breathing and light stretching.

How many coaching points can you name when performing a pull throw. Which piece of equipment could you throw the furthest? Which was the most challenging?

 **Made easier:** remain on knees, targets closer or larger.

 **Made harder:** standing throws, targets further away or smaller.

LEARNING OBJECTIVE:

Can you work cooperatively as a team to perform relays?

RESOURCES:
cones, Bean bag,
battons, mini hurdles

ASSESSMENT CRITERIA:

- BRONZE** I can cooperate with others to perform tasks often accurately.
- SILVER** I know what my team needs to do to perform with accuracy and speed.
- GOLD** I can keep control of my body and support my team mates to know where and when they need to run.

WARM UP

Cat and mouse tag. 3-4 children chosen to be cats. The rest are mice. Mice must try and escape the cats whose aim it is to tag them. Upon being tagged a mouse must stand still. Other 'free' mice can release them by circling them twice.

MAIN ACTIVITY

Explain that relay is a team event where children have to work with others and cooperate.

TASK 1: Teams of 4. 2 children at each end. Continuous shuttle running passing bean bag then baton. Children can only go when they have the bean bag or baton in their hand. Cannot through it must pass it smoothly to the next person.

Repeat with how many shuttles each team can achieve in a given time frame. Can they best their team's personal best?

LEARNING OBJECTIVE:

Can you work cooperatively as a team to perform relays?

RESOURCES:

 cones, Bean bags,
 battons, mini hurdles

TEACHING POINTS:

Do not run until you have been tagged/high fived by incoming runner
 Encourage team member when to run or what they have to do during relays
 Pass equipment accurately and quickly to hands, try not to lose speed or drop equipment.

LESSON KEYWORDS:

 Relay
 Baton

MAIN ACTIVITY

TASK 2: Bean bag relay. Divide class into 4 groups and the space into 2 playing areas. Each group must stand at opposite ends of the playing area. In line with teams place a hoop for each team to act as a goal. Place a number of bean bags on the centre line between both teams. On teacher command 1 pupil from each team at a time must run forward to the centre line to collect a bean bag and return it to their hoop.

COOL DOWN

Gentle jogging
 then walking on
 teachers command
 'freeze'

Comment on
 your team's
 performance.

TASK 3: Obstacle relays using mini hurdles, slalom cones, ladders etc. Can the children remember what actions they need to perform and when? Do they know when they need to go?

 **Made easier:** shorter shuttles, more children in a team.

 **Made harder:** longer shuttles, less children in a team.
